- **Import library and load dataset in python**

The screenshot displays a Jupyter Notebook interface with the following content:

```
import numpy as np
import pandas as pd
import matplotlib.pyplot as plt
import seaborn as sns
import sklearn as sk
```

Below the code cell, the output shows the first few rows of the 'Global_Superstore2.csv' dataset loaded into a pandas DataFrame:

- **Understanding and Analyzing the dataset by using python library's.**

```
